The Lightweight Planner is a project planning and tracking tool for eXtreme Programming teams.

Run: <http://www.lightweightplanner.com/LightweightPlanner.msi>

In the *eXtreme Programming* planning process, also called Scrum. The customers pick the features to be added (user stories) to each development iteration (typically, one to three weeks in duration). The developers estimate the effort to complete the stories at the story level. A release defines a customer release and consists of one to many iterations in each project. The Incarnation defines the construction of the development or the customer organization. The *Lightweight Planner* was created to support this process and addresses issues experienced in real-life *eXtreme Programming* projects.

Works as a:

- Scrum tool.
- Multi user system.
- Time tracking system.
- Reporting system.
- Analysis system.
- Scalable system.

Runs as:

- A Windows Application
- An ASP.Net Web Application
- Both, if connected to the same database.

You! choose the **database system** you want to use as storage device.

-  MS SQL Server
-  Access
-  MySQL
-  Oracle
-  PostgreSQL
-  Firebird
-  PervasiveSQL
-  VistaDB
-  SQL Anywhere
-  Advantage
-  DB2
-  Sybase
-  SQLite

You just have to set the connection string in the configuration file, the database structure is created on the first connect. The default database setup for the windows Lightweight Planner, is a simple xml file for local use.

K:L:O:N:K

The K:L:O:N:K Lightweight Planner is a project in constant development. Please feed us with feedback and new requirements.

We take your own medicine.

K:L:O:N:K uses the Lightweight Planner to manage the development of the Lightweight Planner.

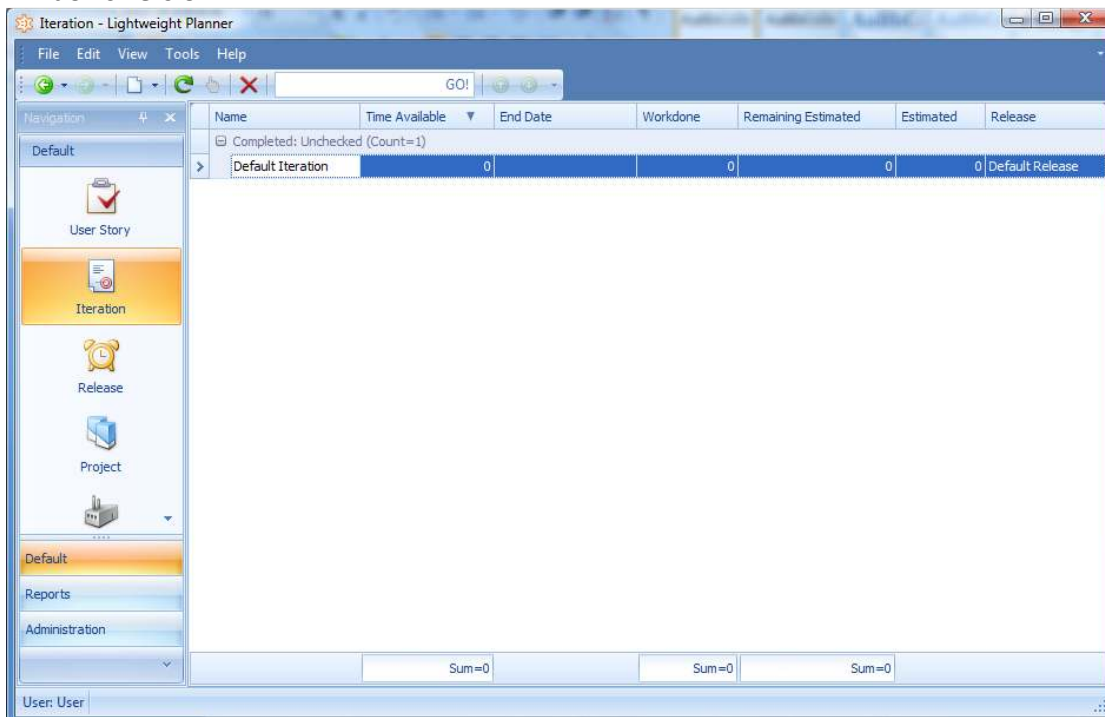

The Lightweight Planner is brought forward from project to project in K:L:O:N:K customer projects when possible.

The installation and user descriptions are under construction.

The downloaded version of the K:L:O:N:K Lightweight Planner is currently a free version for non commercial use.

Web version:

The screenshot shows the 'Lightweight Planner' web application running in Mozilla Firefox. The browser's address bar shows the URL: `http://localhost:53680/default.aspx?ShortcutViewID=Iteration_ListView&ShortcutObjectClassName=LightweightPl...`. The application interface includes a navigation menu with items like 'User Story', 'Iteration', 'Release', 'Project', 'Incarnation', 'Work Log', 'User', and 'My Details'. A table displays iteration data with columns for Name, Time Av, End Date, Workdo, Remain, Estimate, and Release. The table contains one row for 'functionality implemented' and a summary row. The footer of the application shows 'Copyright © - 2009' and 'Færdig'.

	Name	Time Av	End Date	Workdo	Remain	Estimate	Release
Completed: False (Sum=, Sum=2, Sum=7)							
<input type="checkbox"/>	functionality implemented	0	08-12-2008	2	7	9	new bank
Sum=				Sum=2	Sum=7
